"I had the pleasure of working with Carolina while she was interning at McMurry and finishing up her college classes. I was very impressed by how she could jump right in on a project and run with it. She was able to design and manage large projects without much previous experience. She always meet her work deadlines as well as getting her school work done. She is really good with time management, as well as being extremely talented, a team-player and a joy to be around."

"Carolina is one of the best graphic design students I've ever come across. Her work was always on time, and industry quality. She never complained and never lost that incredible smile on her face, no matter how many thumbnails I asked for. She was exceptional especially in my Package Design class, and the comp for her Vital juice box is in her digital portfolio. Now that she is working in the field, Carolina continually gives back to the community."

"I retained Carolina for creative/production/design work on a major re-branding effort for large client. Her work was exemplary, her attention to detail strong and her work ethic unmatched. Despite the intensity of the project, she remained pleasant and professional throughout. I recommend her highly for anyone wanting someone who's ahead of their time in talent and professionalism and wants to work with someone they can trust to get the job done..and done exceedingly well. "It was awesome working with Carolina. She is very detail oriented, very organized and a very take charge type gal. She came through in a time of crunch and did what needed to be done to complete the projects. It was our loss when she took another full time job."

— **Kathy Cecchin**, *General Agency Accountant, McMurry*, worked with Carolina at McMurry

"Carolina was a hard working, very creative and dedicated student. She also was a great problem solver, not just a good designer. She did her research before ever solving the design problem. Her designs have the impact and energy to visually communicate the message or design. She is willing to give back to the design community and to her previous school by coming into my portfolio class, critiquing and reviewing my students work. This is a real benefit to these students."
